Team with us!

Traffic Engineers, Inc. (TEI) is an award-winning traffic engineering and transportation planning firm that develops creative and functional solutions to put life into our public streets. While TEI serves as a prime consultant for a variety of engineering and planning projects, we also appreciate opportunities to partner with leading firms and create strong teams to best meet the needs of our clients.

As a woman-owned business and certified Small Business Enterprise (SBE), TEI strongly supports the utilization and development of a diverse set of firms. TEI provides excellent project-related experience while meeting contract participation goals:

- Metropolitan Transit Authority of Harris County (METRO) certified TEI as a Small Business Enterprise (SBE)
- Texas Department of Transportation (TxDOT) certified TEI as a Small Business Enterprise (SBE)

Please contact us to get started teaming with TEI!

Texas Department of Transportation (TxDOT) has pre-certified TEI project managers in these categories:

**TxDOT Precertification Work Categories**

|   | Brad Eaves, PE, PTOE | Sammy Chen, PE, PTOE | Dustin Qualls, PE, PTOE | Geoff Carleton, AICP |
|---|----------------------|----------------------|-------------------------|----------------------|
| 1.1.1 Policy Planning   |                      |                      |                         | ■                    |
| 1.2.1 Systems Planning  | ■                    |                      |                         | ■                    |
| 1.3.1 Subarea/Corridor Planning                                 | ■                    | ■                    |                         | ■                    |
| 1.4.1 Land Planning/Engineering                                 | ■                    | ■                    |                         | ■                    |
| 3.2.1 Route Studies & Schematic Design                          | ■                    |                      |                         |                      |
