

Job Opportunity

Job Role: Transportation Planning Intern

Timeframe: Summer 2022

Are you interested in learning how sustainable transportation projects go from idea to implementation? Do you enjoy collaborating with change makers and problem solvers?

Traffic Engineers, Inc. (TEI) is an award-winning transportation planning and engineering firm crafting the way cities move in the future. TEI is looking for an intern currently studying city planning, public policy, public health, or a related field, who is curious about the relationships between transportation and the communities it serves. The ideal candidate will be enthusiastic about learning the nuts and bolts of how active transportation projects – like bike lanes and bus routes – get pitched, planned, designed, and built.

As an intern at TEI, you will be immersed in the day to day operations of a professional services firm, working one-on-one with Certified Planners and Professional Engineers, both online and on-site in the field. We are committed to the communities we serve, and candidates must be available to visit local project sites in the Houston or Denver regions. Interns are given hands-on experience working with project leadership through a team-based company structure.

TEI complies with public health guidance from the CDC and local health authorities, and we are committed to helping end the COVID-19 pandemic. Our precautions include requiring all individuals to wear masks indoors, regardless of vaccination status. Work may also include safe, socially-distant meetings outside. Interns may also work remotely/virtually as appropriate.

Selected interns will enjoy the opportunity to:

- Participate in active transportation planning projects you find most interesting.
- Collaborate with motivated people who are passionate about transportation.
- Be part of a casual, fun, fast-paced team.
- Make a positive impact on the environment and the communities we serve.
- Learn the fundamentals of how planning consultants work together with local government.
- Develop maps and use design applications.
- Grow and learn from challenging roles on interesting projects.

Successful candidates will typically possess some or many of the following qualifications:

- Desire to deliver professional client/customer service.
- Willingness to learn, grow, and work hard.
- Clear and effective communication skills.
- Knowledge of Microsoft Word, Excel, and PowerPoint or comparable Office applications.
- Ability to complete calculations and organize data.
- Familiarity with demographic and community-level research, is a plus.
- Familiarity with ArcGIS or another Geographic Information System (GIS) application, is a plus.
- Knowledge of graphic design and Adobe Creative applications, especially InDesign or Illustrator, is a plus.

TEI welcomes and celebrates individuals of all backgrounds, orientations, and identities. Our company has a vital interest in maintaining a fair and equal opportunity working environment.

To learn more about TEI and the work we do, see our website at www.trafficengineers.com.

To apply, please PDF and combine a cover letter and resume and email to careers@trafficengineers.com.
